Objective: Principles of Floral Design is expected to help students attain academic skills and knowledge as well as technical knowledge and skills related to horticultural systems and develop knowledge and skills regarding career opportunities, entry requirements, and industry expectations. This course is designed to develop students' ability to identify and demonstrate the principles and techniques related to floral design as well as develop an understanding of the management of floral enterprises. Through the analysis of artistic floral styles and historical periods, students develop respect for the traditions and contributions of diverse cultures. Students respond to and analyze floral designs, thus contributing to the development of lifelong skills of making informed judgments and evaluations.

Points of Study:

Floral Design Principles and Techniques
Prepare and Evaluate Arrangements
Floral Elements
Contemporary Designs
Management Factors in the Floral Industry
Employability Characteristics of a Successful Employee
Supervised Agricultural Experience as it relates to Floral Design

Student Expectations:

- All students are expected to follow school rules
- Students are expected to be on task during class. All students will be taught safety with floral tools and are expected follow those rules at all times.
